Frontend Engineer with experience developing enterprise web applications using React, TypeScript, Next.js, JavaScript, HTML5, and CSS3. Skilled in responsive design, RESTful API integration, automated testing, accessibility, and page-load optimization. Experienced in collaborating with cross-functional teams throughout the Software Development Life Cycle (SDLC) in Agile environments.

WORK EXPERIENCE

MPAC - Senior Frontend Engineer — Dec 2024 – Present

- Designed scalable frontend architecture using **Next.js (SSR, server components), ReactJS** and **TypeScript**, supporting concurrent users and improving **page load time by 25%**
- Designed **complex frontend workflows** using efficient state management and backend RESTful API integrations, optimizing data fetching and synchronization to reduce **data latency by 20%**.
- Architected an **AI-assisted engineering framework** using **Claude Code**, feature-oriented skills, agents, and reusable workflows, standardizing development practices, reducing context bloat, and driving a **2× increase in sprint velocity**.
- Automated end-to-end unit test generation and validation through **AI-driven workflows**, significantly reducing manual testing effort while maintaining **90%+ test coverage** and improving regression protection.
- Optimized **CI/CD pipelines on GitHub Actions**, reducing test execution time from **20 minutes to under 4 minutes** and accelerating release cycles by **40%**
- Designed reusable form architecture with **React Hook Form, Zod and AJV Validator**, improving form performance, reducing boilerplate, and standardizing validation across complex frontend workflows.
- Drove engineering excellence by **leading code reviews, defining best practices, and mentoring developers**, improving code quality, consistency, and overall team velocity

Vosyn - Senior Frontend Engineer — Aug 2024 – Dec 2024

- Led frontend architecture and technical direction for a **real-time AI video translation platform**, defining scalable design patterns and system workflows
- Migrated a **React JS** application to **Next.js**, implementing **server-side rendering, dynamic routing, and code splitting** to improve **page-load time by 30%** and support application scalability.
- Implemented frontend data flows integrating **RESTful APIs** and Python/Django backend services, reducing response time by **20%**.
- Built high-performance, real-time UI components using **React, Redux Toolkit, Material UI**, optimizing rendering and state management for dynamic streaming data
- Collaborated on **API contracts, SQL query optimization, and deployment workflows** to improve system reliability.
- Established **unit and component testing** standards using **Jest and React Testing Library**, improving application stability and reducing production issues.
- Worked closely with product and engineering teams to define feature roadmaps, ensuring scalable and maintainable implementation of core platform capabilities

Consultant and Freelancer Web Developer — July 2023 – Oct 2024

- Architected and delivered **scalable frontend solutions** for startups using React, TypeScript, Node.js, Redux, and Tailwind, driving improved performance and user experience
- Completed **20+ client projects** across Fiverr and Upwork, consistently delivering high-quality solutions with strong client satisfaction
- Advised businesses on **UI/UX, performance optimization, and digital presence**, improving engagement and online visibility

Apexon - Senior Frontend Engineer — Aug 2022 – Dec 2022

- Led frontend architecture for a **$100M warehouse management system**, managing a team of 5 developers and ensuring scalable, maintainable design
- Built and tested **RESTful APIs using Node.js**, integrating backend services with **React and TypeScript** applications.
- Optimized frontend rendering and asset loading, reducing page-load time by approximately **2 seconds** and achieving **90+ Lighthouse performance and accessibility scores.**

- Built a suite of **30+ reusable, responsive components** using React and TypeScript, **maximizing reusability across multiple products and accelerating development velocity.**
- Established best practices for **state management (Redux Toolkit, Context API)** and code quality, improving team productivity and delivery timelines

Deloitte – Frontend Engineer Mar 2021 - Aug 2022

- Developed over **50 reusable, responsive, and cross-browser compatible components for 4 marketing campaigns**, catering to a **$1.8 Trillion E-commerce business client,** using **BrowserStack** for cross-browser testing**.**
- Worked closely with UX/UI designers to ensure pixel-perfect implementation of user experience and user interface design, contributing to a **2% increase in user registrations**.
- Enhanced user engagement by increasing **average session duration by 20%** through the development of engaging frontend experiences.
- Maintained a **post-deployment bug rate of less than 1%**, ensuring high-quality deliverables for client projects.
- Ensured **cross-browser compatibility on 95%** of major browsers, guaranteeing a seamless experience for users across different platforms.
- Achieved a **Lighthouse SEO score of over 90** for web applications, optimizing their visibility and ranking on search engines.
- Implemented and tested accessibility features against **AODA/WCAG 2.0 AA** requirements, including **keyboard navigation, focus management, semantic HTML, and screen-reader support**.

Freshworks - Frontend Engineer Mar 2018 - Mar 2021

- Overhauled to the redesign of the UI/UX for the FreshBot customer support bot training dashboard using React, **enhancing the user interface experience for over 500 clients and achieving a 10% improvement in customer satisfaction**.
- Facilitated smooth collaboration with the backend team by thoroughly documenting and **integrating with over 100 backend APIs and workflows**.
- Developed and maintained over **10 front-end features** integrating AI into Freshdesk using **Ember JS, React JS, Java, and, Spring Framework, Spring Boot** driving a 20% increase in the customer base.
- Executed comprehensive testing using **Mocha and Selenium**, achieving a **95% defect detection rate** and ensuring high software quality standards.
- Actively **participated in Agile ceremonies**, including daily stand-ups, sprint planning, and retrospectives, fostering improved team collaboration and project delivery.
- Provided **post-implementation support**, troubleshooting and resolving **100+ customer-reported technical issues within one month**, earning recognition for performance.

EDUCATION

Bachelor of Technology in Computer Science July 2014 - May 2018

SRM Institute of Science and Technology

Post Graduate Certificate in Cloud Computing Technologies Jan 2023 – Aug 2023

George Brown College

Post Graduate Certificate in Project Management Sept 2023 – Apr 2024

Georgian College

TECHNICAL SKILLS

- Programming Languages: JavaScript, HTML5, CSS3 and SQL
- Frameworks and Libraries: React JS, Next JS, Node.js, TypeScript, Redux, Babel, Vite, React testing Library, SASS, Tailwind, and Bootstrap
- Database Systems: MySQL, Postgres, Redis, Oracle Database, Hibernate/JPA, triggers, views and sequences
- AI & Agentic Engineering: OpenAI Codex, Claude Code, Cursor, OpenAI API, LangChain/LangGraph, RAG, AI agents, MCP integrations, agentic development workflows, LLM-assisted software engineering, AI-assisted code generation, code review, debugging and automated testing, prompt engineering, developer workflow automation.
- Technical: Design Patterns, Data Structures and Algorithms, Version Control, Git, NPM, JSON, jQuery, Axios, Postman, Figma, CI/CD, Kubernetes, Jenkins, Docker, Azure, Amazon Web Services, RESTful APIs, SEO, Agile Methodology, Jira, and SDLC.
